LIVE OR DIE WORLD LEADING BREEDING RECORD FOR FROZEN SEMEN

Live Or Die USA smashes expectations with world leading fertility to accompany his racing and progeny performance records when the 25yo dry mare Milwaukee Squaw went in foal with frozen Live Or Die semen on her first insemination.

It was late in the 2017 breeding season and part of a trial of Live Or Die's semen that was previously frozen down by Nevele R Stud.

Dr. Ed Annand of EquiEpiVet achieved a 100% strike rate with Live Or Die frozen semen - 4 out of 4 mares in foal with 3 positives on their first attempt.

"***The semen looks good under the microscope however as always it is the conception results that are the real measure of frozen semen fertility and by this measure - Live or Die is certainly optimal.***" - Dr. Ed Annand of EquiEpiVet.

Milwaukee Squaw has produced 5 foals winning in 1:58 or better and a 2yo, 2:00 winning filly. This coming Live Or Die foal will be a full sibling to 1:56.6, 9 race winner Red Cruiser.
